

3M™ Privacy Computer Filters

Mind Your Own Business

Excellent for open, high-traffic environments or where ever on-screen data needs to be kept private;
3M™ Privacy Computer Filters utilize a microlouver privacy technology which makes on-screen data visible only to persons directly in front of the monitor; will not blur or distort image.

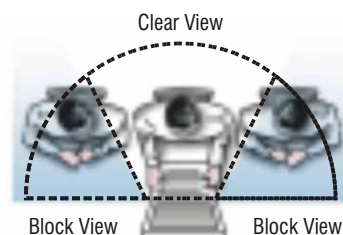

3M Privacy Notebook and LCD Filters

- Screen data is only visible to the person directly in front of the monitor. User sees a clear, bright screen with no blurring or image distortion. 3M™ Privacy Computer Filters darken screen data when viewed from the side.
- Frameless notebook filters remain in place even when closed.
- Helps protect your LCD screen from dents, scratches and dings.
- Reduces screen glare for easier, more comfortable viewing.

Now you see it , now they don't.

Screen data visible only to persons directly in front of the monitor. From the side passers by see only a dark screen.

3M Privacy Computer Filters help stem the tide of corporate information loss and identity theft that costs billions every year.

- Fortune 1000 companies incurred corporate information loss of more than \$45 billion due to theft of proprietary information (PricewaterhouseCoopers).
- Every year, U.S. company secrets worth an estimated \$250 billion are stolen because of indiscreet business practices (source: survey by the American Society for Industrial Security).
- The FTC tracked 27.3 million cases of identity theft in the last five years alone (Federal Trade Commission).
- 3M™ Privacy Computer Filters help block the screen view from anyone viewing the computer from a side view. 3M's unique micro-louver privacy technology allows persons directly in front of the computer to see on screen data clearly.
- 3M™ Privacy Computer Filters use screen darkening privacy technology, rather than common blurring or distorting of screen data to prevent casual onlookers from viewing your screen.
 - It's easier on your eyes
 - Protects your on screen data in high traffic areas
 - Protects the fragile surface of LCD screens from scuffs and scratches

- Look for 3M™ Privacy Computer Filters in a variety of sizes to fit:
 - Most Notebook Computers, including widescreen models
 - LCD Desktop Monitors
 - CRT Monitors

Size (Notebook or LCD Monitors)	Filter Viewing Area Height x Width	Viewing Area Diagonal	Fits Monitor Size
PF12.1	7.32" x 9.74"	12.1"	12.1"
