

Curve Screen is a proprietary screen technology solution designed for in particular for simulation and training application. Front projection or rear projection is possible except rear projection has limited in image sizes. Curve screen can come in different radius, various surface finishing and arc angle to the extend of 360 degrees circular screen. The combination of right Remaco optical paint to achieve right gain couple with high quality screen structure give you ideal application.

- ✓ A sense of presence in the displayed content is achieved
- ✓ An immersive or, wrap around visual experience occurs
- ✓ Increased fields of view are achieved which increases peripheral vision
- ✓ Tough and Easy Maintenance
- ✓ Wide Viewing Angle and High Contrast

Application : Simulation, Training, advanced immersive visualization entertainment, theme parts and Edutainment

Maximum height : 12metres

Arc Angle : 30 degrees to 360 degrees

Radius : 2metres to 20metres

Curve Screen
