

SONY

3LCD Laser Projector

Why Sony?

Sony is a major professional in the world of imaging technology, across both consumer and professional applications.

Sony's comprehensive imaging technologies extend across a wide range: lenses, image sensors, image processors, IP transmission, display devices and light sources. Products are developed by engineers with deep and broad experience in imaging technologies.

As a leading global manufacturer for professional users, Sony offers superlative moviemaking and broadcasting, as well as medical equipment and business and educational products.

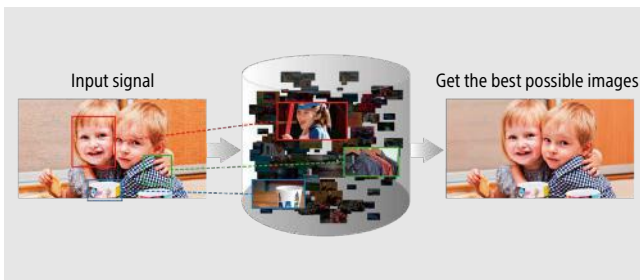

Image quality

Beautiful detail and faithful color reproduction

Sony's BrightEra™ 3LCD panel works with Sony's original Z-Phosphor™ light source to deliver unmatched clarity, color reproduction and brightness.

Sony's 'Reality Creation' engine delivers ultra-high accuracy by combining database-driven, super-resolution processing with image pattern classification. Automatic control of both super-resolution processing and noise reduction ensures stunning image quality, smooth gradations and low noise.

Reliability

Designed to be reliable

Sony's development process ensures that all new products meet our high standards for image quality.

Auto color calibration

The projector automatically adjusts RGB balance to keep accurate color reproduction

Cooling design

A highly efficient heat sink maintains excellent performance over prolonged use.

Dust-proof design

Cleaning robotics and electrostatic filtering maintain efficient ventilation to maintain brightness.

Simple and discreet

The projector's minimalist design looks great in any space, blending seamlessly into the background of conference rooms, museums, and other sophisticated locations.

An experienced team of designers have created a functional, aesthetically pleasing product that is durable, easy to set up, and easy to use.
